

From Our Families to Yours

Brewery Creek History Pic of the Week: Louise Drugan, Pait Johnson, Douglas Johnson, Gaven Johnson, and Roy Johnson standing beside a haul truck at the Brewery Creek Mine operating under Viceroy. Photo taken September 12, 1994.. Photo Credit: Thanks Roy Johnson

Thank you Dawson for the great fall and the pleasure of working in the community and the traditional territory of the Tr'ondëk Hwëch'in. Our fall drill program is complete and we are proud to have operated safely within the global pandemic with a crew from within the Yukon, again providing Yukoners can operate projects keeping jobs and contract local.

We are actively working behind the scenes to complete necessary plans to restart the Brewery Creek Mine. We have many plans and studies required to ensure we operate both a profitable operation that will offer a long mine life to benefit the community and a program that is socially and environmentally responsible.

We wish everyone great health, prosperity and safety.

Janet Lee-Sheriff, Chief Executive Officer

In our last newsletter we told you about our **Yukon Mint Gold & Silver Coins**, and today we're excited to announce that they're here! Featuring artwork from local Yukon artist Brian Walker with his piece commissioned for the 2020 Arctic Winter Games, *The Wealth That Is Our Children*. We agree with Brian in that the future is in our children. We have generations of families who have worked at Brewery Creek, and with the re-opening of our mine we anticipate this tradition will continue on. Check out our gold and silver coins at www.yukonmint.com - they're available for purchase!

Community First: The Golden Predator Community Commitment

The Brewery Creek Mine is committed to being a positive contributor and member of the Dawson City community, respectfully working in the Tr'ondëk Hwëch'in traditional territory. We employ best practices ensuring local economic benefits, meaningful and significant private sector employment, sound environmental management and a safe and healthy work place. We envision a long future together, with meaningful contribution to the well-being of the community leaving a positive legacy from the opportunity of working together over a mine life that includes development, production, ongoing exploration and eventual complete reclamation and remediation at our site. It's our tomorrow together.

Check out our new video featuring Brewery Creek Project Geologist, Jeff Cary. This video was filmed in October 2020 during our fall drill program. The 2020 program consisted of 60 drill holes for ~5600m of drilling including ~4400m of exploration and in-fill drilling plus 1200m of metallurgical and geotechnical drilling. All drill samples have been shipped and are currently being processed. We are excited for the results.

Come Say "Hi!"

The Brewery Creek History Project

Over the past decade, Golden Predator has heard many amazing and interesting stories about the Brewery Creek mine from people who built the roads to those who worked in the labs, managed the site, worked to develop and build a mine and served as community leaders. The stories are incredible and a rich piece of the Dawson City history, one we want to capture in the **Brewery Creek History Project**. We are currently working on several videos and creating a photo collection and exhibit.

We hope our story will continue to form a colourful history while celebrating the history that collectively brings us to the point of the reopening of the mine.

Fast Fact: Try to name a project, other than Brewery Creek, that has a longer, consistent history of database of water sampling and environmental monitoring.....Brewery Creek has been professionally and respectfully managing exploration, development, production and temporary closure to high standards for ~40 years thanks to the amazing work of many companies, employees and contractors.
